ABOUT ME

My name is Sambit Nag. I am a Computer Science student with a strong interest in technology, programming, and financial markets. Alongside my academic journey, I am also an active trader, combining analytical thinking with market insights to make informed decisions. My passion lies in exploring how technology can enhance financial strategies, and I aim to bridge both fields by developing innovative tech-driven solutions in the future.I enjoy working on real-world projects using HTML, CSS, JavaScript, and PHP, while also exploring emerging technologies such as AI, quantum computing, and ethical hacking.
